MAINROAD GROUP

SALVADOR READY MIX CONCRETE

Salvador Ready Mix Concrete was originally established in 1953 as a family business in the ready mix, sand, and gravel business by Rudy Salvador, his brother, and father. Mainroad Group took over the business in 2005 with much success as both businesses saw the many advantages a partnership would present for mutual benefit in the East Kootenay region.

Head office is located in Cranbrook with concrete plants in Cranbrook and Kimberley. There are three aggregate pits with production facilities and gravel sources in Cranbrook and Fort Steele to serve our customers. A mobile crushing unit for custom or specialized crushing needs is available; as well as stacking wall blocks and equipment rentals are also offered.

Salvador sells its products to road builders, home builders, resort developers, home owners, industrial and commercial consumers.

Current available products are pit run, 50mm crush, 20mm crush, 12.5mm crush (bedding sand), electrical sand, 40mm drain rock, 20mm rock, 12.5mm rock, concrete sand, masonry sand, oversize rock, and 1 ½" to 6" rock.

Salvador Ready Mix Concrete is a current member of:

British Columbia Ready Mix Concrete Association

Southern Interior Construction Association
