

your roads – your team

MAINROAD GROUP

MAINROAD TRANSTRONIC SERVICES

With the management of automated counter-flow systems, swing bridges, and tunnel operations within its road maintenance mandate, Mainroad has taken that expertise down new roads via the 2005 launch of Mainroad Transtronic Services (formerly OnTime Electrical) and has become a leader in the servicing of new electronic systems technologies in fields such as:

- ITS (Intelligent Transportation Systems)
- Fibre optic and copper telemetry systems
- Video and Lighting Systems
- Programmable Logic Controllers
- SCADA Systems
- Logic Systems
- CCTV Design
- Electrical/electronic computer controls
- Electronic Hardware Design/Software Design Solutions
- Tolling Systems
- LED Message Signs and Video Displays
- Lab Repairs for Traffic Control Equipment

This division of the Mainroad Group has achieved great success in both public and private ventures. As we focus towards the future in our research and development, this company is poised to lead Mainroad Group further down the road of electronic high technology controls and maintenance services for the road and bridge industry and well beyond.

Mainroad Transtronic Services not only maintains contracts with private vendors across BC, but also works within Mainroad's Lower Mainland, Howe Sound, and South Island contract areas to provide various automated counter-flow operations, swing bridges, tunnel operations, tolling systems, and web-camera operations.
