Raylec Power LP

ISO9001:2008 Registered
Installation and Maintenance
of Electrical Equipment

Raylec Power is a versatile electrical contractor specializing in construction, complex system installations and a wide range of maintenance services. Raylec Power has been serving commercial and industrial customers on Vancouver Island and throughout British Columbia for over twenty-nine years. Head office is located in the Comox Valley with branch offices in Nanaimo and Victoria. Raylec Power joined the Mainroad Group in 2012 complementing synergies with Mainroad's Vancouver Island based companies, G&E Contracting, Mainroad South Island Contracting, SPR Traffic Services as well as Lower Mainland based Mainroad Transtronic Services.

Areas of specialization include:

- Airfield Lighting and Controls
- Alpine Chairlift Installations
- Circular Traffic Loops/Count Stations
- General and Preventative Maintenance
- Intersection Control Systems
- Ornamental Street Lighting
- Parking Lot Lighting
- Power Distribution Systems
- Red Light Cameras
- Shipyard and Marine Electrical
- Traffic Signal Installation and Maintenance
- Underground Power

Key Customers

The Ministry of Transportation and Infrastructure recently awarded Raylec Power a four-year contract to provide electrical service and maintenance for the Vancouver Island Service area. Raylec Power held the previous contract for eight years.

Raylec also provides industrial construction and follow up maintenance to several facilities on Vancouver Island including:

• Mt. Washington Ski Resort Ltd. • Two Sawmills • BCF Shake Mill • Two Fish Hatcheries • Municipalities: Courtenay, Comox, Campbell River, Nanaimo • CFB Comox • CFB Esquimalt • BC Ferry Services • ICBC

In addition, the company provides traffic and intersection electrical maintenance both on call and annual contract for

• Esquimalt • View Royal • Langford • Colwood • Central Saanich • Nanaimo • Parksville • Qualicum • Courtenay • Comox

Raylec Power follows rigorous quality management processes to ensure quality results that meet the requirements of ISO 9001:2008 standards. Raylec Power is an active industry member of the Electrical Contractors Association of BC and is COR certified by the BC Construction Safety Alliance.
